

Wilson Area School District
Community Use of Athletic Fields

The School District offers the use of its fields to the Community Recreation Board(s) in consideration of the community benefit to young people, and in turn expects cooperation from the Recreation Board(s) toward both the district facilities and the district school activities. In particular the following restrictions and conditions apply:

1. Application must be made through the appropriate building principal on the approved Use of Facilities Request form.
2. School district activities have priority for district facilities.
3. Fields are to be used by the appropriate sports -- midget football may not play on the field hockey and soccer fields.
4. Recreation teams may not play or practice on a field adjacent to the district competition if they present a distraction, confusion, or interference (as with officials' whistles, etc.)
5. Recreation teams may not alter real property without Board permission. No advertising signs may be placed on district fields. If the district must remove signs or in any way return real property to its original condition, the Recreation Association will be billed.
6. The public address system(s) may not be used prior to 12:30 p.m. on Sundays.
7. Failure to comply with these or other regulations set forth in this or in companion policies could lead to the withdrawal of permission to use Districts Facilities.
